

# Gurzu QA Onboarding

- [Welcome to Gurzu QA Tribe](#)

# Welcome to Gurzu QA Tribe

Once you go through the [Gurzu Onboarding](#) process, You should be clear about how things work here at **Gurzu**. There are few things you might need before operating as a Gurzu QA Engineer.

## **Handover:**

- As a QA, the first thing to do is to know the product and its internal details. Take time to read and understand the product.
- Set a call/meeting with the QA/Team Lead/PMO involved to grasp more knowledge or to clear the confusion.
- Understand the nature of the work, deadlines, priorities, requirements, work remaining, etc

## **Get Update:**

- Know the tools and technologies that have been used for the project.
- Get access: Ask for access to the related documents(Test cases/Test plan/other Reports), tools(Gitlab/Sentry/Figma/Firebase/etc),
- Setup all the required tools.

## **Know the Process:**

- How the testing process is organized in the company. [STLC](#)
- Which of the team has what responsibilities
- What types of testing are performed?

After onboarding, there always comes a time when it becomes easier and more interesting to work.
